- Be careful not to knock over the iPod when inserted to prevent dock connector damage.
- Don't use with any other iPod accessories, such as FM transmitters and microphones, because they may cause a malfunction.

HOOKING UP THE DOCK CONNECTOR

■ Connecting to AV receiver

■ Connecting to Amp, Monitor

■ Connecting to Marantz product's remote control jack (RC-5)

- When the dock connector is used without connecting any other Marantz product's remote control jack, set the switch to "INT".
- By connecting the dock connector's remote jack to the remote jack on other Marantz product, the dock connector can act as a remote control signal receiver for the other Marantz product. In order to do this, set the dock connector's switch to "INT.", and set the remote jack on the connected Marantz product to "EXT."

- If IR remote of other Marantz product is used instead of the dock connector's remote, set the switch to "EXT." dock connector.

SETTING

MODE SETTING

You can operate your iPod with this dock connector in two modes, OSD mode and LCD mode, and mode selection can be available by pressing MODE button.

Note

- Note that in case of removing AC adapter or blackout occurrence after mode setting, the dock connector is set to OSD mode(default setting).

■ OSD Mode (On Screen Display Mode)

Only remote controller can control your iPod. "marantz" is shown on your iPod's display. The connected TV's screen shows the Control Menu to control your iPod.

The menu will display again when PLAY/PAUSE or other operation buttons are pressed.

■ LCD Mode
