

SR5600

## DOLBY DIGITAL EX® /DTS ES® SURROUND RECEIVER

The SR5600 is an embarrassment of riches. Each “current feedback” amplifier produces 90 Watts RMS, sufficient for all but the largest rooms or most inefficient speakers. The 32-Bit microprocessor decodes all Dolby, DTS surround sound formats, and SRS’ Circle Surround 6.1. Consider the SR5600’s multi-source/multi-room capabilities. Look no further than the front panel inputs to conveniently plug in a camcorder, portable DVD player and/or game console. You’ll appreciate the SR5600’s enhanced video conversion capabilities as you watch a full complement of sources through your monitor’s high quality component video input. Want a customized system? The RS232 port allows total control for external sources. The on-screen display quickly guides you through setup. The SR5600’s “Lip Sync” circuit assures you that sounds reach your ears at exactly the moment your eyes say they should. And its all covered by a three-year warranty.
