CD6004 Compact Disc Player With USB Input

The new CD6004 Compact Disc player with USB Input delivers your favorite performances with digital speed and clarity tempered by a fresh approach to analog audio topologies courtesy of the Marantz engineering team. Hyper Dynamic Amplifier Modules or HDAM's, a Marantz proprietary technology culled from our flagship Reference Series components, are utilized here to reproduce music with a uncanny balance of bass, midrange and treble for a digital listening experience that can only be described as "analog". The addition of a "Made For iPod" USB input brings these extraordinary qualities to your iTunes library.

Sound Quality

- HDAM-SA2 circuitry on board
- High-Current Cirrus Logic CS4398 D/A converter
- Tight tolerance, audio-grade components
- Precision System Clock
- Double layered bottom plate
- Gold Plated L/R Coaxial Outputs

Flexibility/Expandability

- Two iPod operation modes
- Support for Optical and Coaxial digital outputs
- IEC type detachable power cord
- Quick Replay
- Dedicated remote w/Marantz amp control
- Premium (Wide Pitch) L/R output jacks
- CD-Text/Meta data Display
- Flasher Input

because music matters
