## FOREWORD

This section must be read carefully before any connection is made to the mains supply.

### WARNINGS

- Do not expose the equipment to rain or moisture.
- Do not remove the cover from the equipment.
- Do not insert anything into the equipment through the ventilation holes.
- Do not handle the mains lead with wet hands.

## EQUIPMENT MAINS WORKING SETTING

Your Marantz product complies with the household power and safety requirements in your area.

“/02” Version product can be powered by 230 V AC only.

## IMPORTANT

This apparatus is fitted with an approved moulded 13 Amp plug. To change a fuse in this type of plug proceed as follows:

1. Remove fuse cover and fuse.
2. Fix new fuse which should be a BS1362 5A, A.S.T.A. or BSI approved type.
3. Refit the fuse cover.

If the fitted plug is not suitable for your socket outlets, it should be cut off and an appropriate plug fitted in its place.

If the mains plug contains a fuse, this should have a value of 5A. If a plug without a fuse is used, the fuse at the distribution board should not be greater than 5A.

### NOTE:

The severed plug must be destroyed to avoid a possible shock hazard should it be inserted into a 13A socket elsewhere.

## HOW TO CONNECT A PLUG

The wires in the mains lead are coloured in accordance with the following code:

BLUE—“NEUTRAL” (“N”)

BROWN—“LIVE” (“L”)

1. The BLUE wire must be connected to the terminal which is marked with the letter “N” or coloured BLACK.
2. The BROWN wire must be connected to the terminal which is marked with the letter “L” or coloured RED.
3. Do not connect either wires to the earth terminal in the plug which is marked by the letter “E” or by the safety earth symbol  $\perp$  or coloured green or green-and-yellow.

Before replacing the plug cover, make certain that the cord grip is clamped over the sheath of the lead — not simply over the two wires.

## COPYRIGHT

Recording and playback of some material may require permission. For further information refer to the following:

- Copyright Act 1956
- Dramatic and Musical Performers Act 1958
- Performers Protection Acts 1963, and 1972
- Any subsequent statutory enactments and orders

## PRECAUTIONS

The following precautions should be taken when operating the equipment.

## GENERAL PRECAUTIONS

When installing the equipment ensure that:

- the ventilation holes are not covered.
- air is allowed to circulate freely around the equipment.
- it is placed on a vibration-free surface.
- it will not be exposed to excessive heat, cold, moisture or dust.
- it will not be exposed to direct sunlight.
- it will not be exposed to electrostatic discharges.

In addition, never place heavy objects on the equipment.

If a foreign object or water does enter the equipment, contact your nearest dealer or service center.

Do not pull out the plug by pulling on the mains lead; grasp the plug.

It is advisable when leaving the house, or during a thunderstorm, to disconnect the equipment from the mains supply.

# 1. INTRODUCTION

Thank you for purchasing the Marantz MA6100 power amplifier for your sound system. Please take a few minutes to read this manual thoroughly, before you attempt connections and operation.

The Marantz MA6100 is a monophonic (single channel) amplifier, that is designed for home theater and high quality audio systems.

# 2. FEATURES

- The MA6100 is a monaural power amplifier developed for use in hi-fi AV systems.
- It is a high-power power amplifier with all-discrete circuit configuration with rated outputs of 125 W/8-ohms.
- It is designed with narrow panel area to reduce the installation area. The width becomes 17-3/8 inches (440 mm) when 5 units are placed side by side.
- The small space requirement is ideal for use as an extension amplifier for AV components such as a Dolby Digital Surround processor.
- It is provided with the MARANTZ remote control capability so its power can be controlled from a MARANTZ preamplifier or integrated amplifier (MARANTZ remote control compatible products).
- The power of the unit can be switched by remote control using a video signal or DC signal.

\* THX

THX is an exclusive set of standards and technologies established by the world-renowned film production company, Lucasfilm Ltd. THX grew from George Lucas' personal desire to make your experience of the film soundtrack, in both movie theatres and in your home theatre, as faithful as possible to the master recording.

Before any home theatre component can be THX Ultra certified, it must pass a rigorous series of quality and performance tests. Only then can a product feature the THX Ultra logo, which is your guarantee that the Home Theatre products you purchase will give you superb performance for many years to come.

### Home THX Amplifiers

With today's superior quality but exceptionally complex audio systems it is important to ensure that noise, distortion and frequency response errors are negligible in all links in the audio chain. With discrete multichannel sources it is especially important that maximum power is instantly available without instability, rise in distortion or other undesirable side affects. THX Ultra requirements cover every performance aspect of this product including operation, output power levels, gain, frequency response and numerous other parameters. Whether you choose music or movies, multichannel or stereo, this amplifier will be supremely flexible, easy to use, sonically transparent and absolutely reliable.

# 3. NAMES AND FUNCTIONS

**① POWER switch**

Press the button to turn power on (POWER ON mode), and press it again to turn power off (POWER OFF mode). When it is required to remote control the power mode of the MA6100, be sure to leave this switch in the POWER ON mode.

**② POWER ON indicator**

A POWER ON/ STANDBY indicator The indicator glow red when the unit is in Standby mode and blue when the unit is On.

**③ Audio INPUT jack**

Connect the preamplifier output to this jack.

**④ Audio INVERT OUTPUT jack**

This jack is for output of signal which was inverted from the normal input signal.

**⑤ REMOTE CONT. IN jack**

Connect with the remote control output jack of a component which is compatible with MARANTZ remote control system. The remote control allows to switch the power of the MA6100 between the "POWER ON" mode and "STANDBY" mode.

**⑥ REMOTE CONT. OUT jack**

Connect with the remote control input jack of a component which is compatible with MARANTZ remote control system.

**⑦ EXT. CONT IN jack**

Not connected when the power is to be controlled from a MARANTZ remote control unit.

Connect to the video signal output of a video component when the power is to be controlled based on a video signal.

The external control allows to switch the "POWER ON" and "STANDBY" modes of the unit according to the "presence" and "absence" of video signal.

When the video signal becomes absent while the power of the unit is on, it enters the "STANDBY" mode in about 4 seconds; the unit enters the "POWER ON" mode again when the video signal is input again.

As the control data of the EXT. CONT IN jack is also output at the REMOTE CONT. OUT jack, the MA6100 units connected after this unit can also be switched between the "POWER ON" and "STANDBY" modes.

Leave Power switch ① in the ON position.

\* External control using a signal from 5 to 13 V in place of video signal is also possible using this jack. However, as this scheme belongs to the professional use, please consult MARANTZ if you want to adopt such an external control scheme.

**⑧ SPEAKER SYSTEM terminals**

Connect with speakers using speaker cords. Respect the + and - polarity when connecting speakers.

Use speakers with an impedance of 8 to 16 ohms.

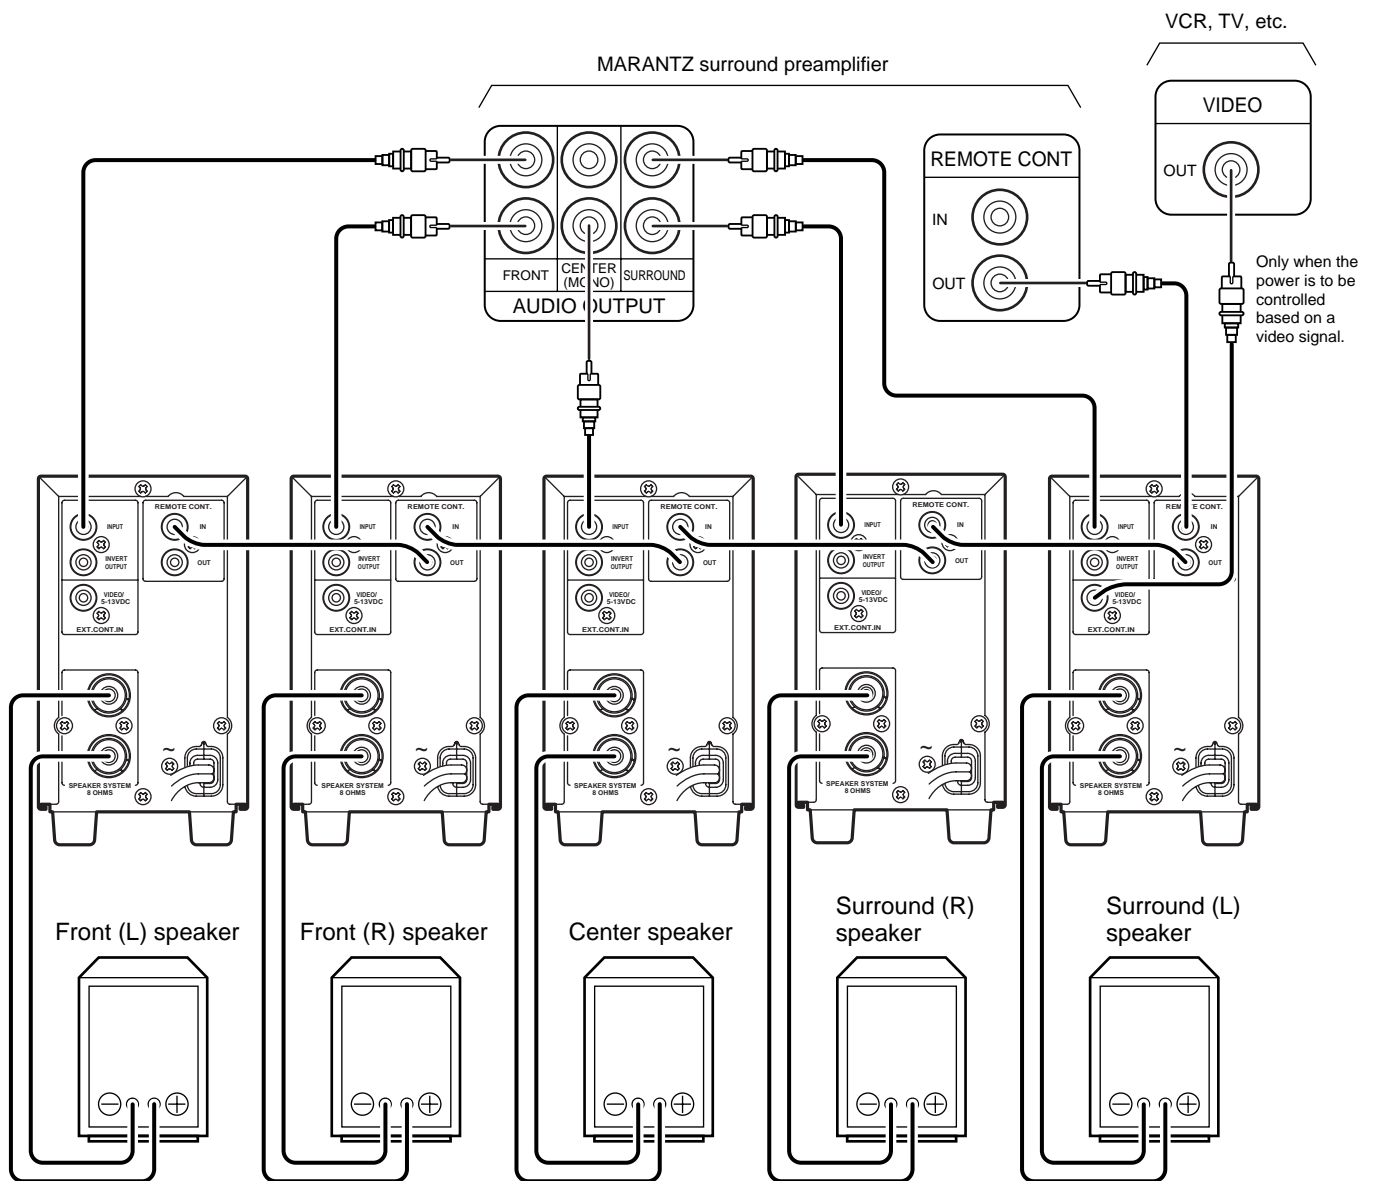

**⑨ Power cord**

Insert the plug at the extremity of the power cord into a 230 V AC household AC outlet.

To Enjoy sound with a higher quality, it is recommended to match the power connection polarity with other components. The white-lined wire of the power cord is the neutral (GND) wire.

## 4. CONNECTIONS

### Connection for a 5-channel system

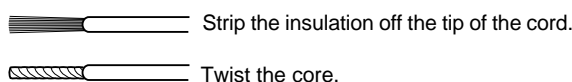

## 5. SPEAKER CONNECTION

This equipment, being a high audio output power amplifier, has a hazardous energy at its speaker terminal. Please be sure to make an appropriate speaker connection according to the following procedures:

- \* Confirm that the power switch of the equipment is at "OFF" position. If it is at "ON", turn it to "OFF" position to connect a speaker cable.
- \* Use a speaker cable with the flame retardant rating of Type SPT-2 or more.
- \* Don't strip the insulation off more than shown in the figure, at the speaker terminal connection of speaker cable.

- \* Connect speakers in correct polarity, according to the indication for the polarity of speaker terminals.
- \* Connect a speaker cable to the speaker terminal in such the condition that the insulated part more than 1.6 mm of the speaker cable is inserted into the terminal and that the bare core of the speaker cable is never exposed outside the terminal.
- \* Prevent any stress from being applied to the speaker cable connected to the speaker terminal.
- \* Don't touch the speaker terminals during operation.

Speaker cable (Type SPT-2)

## 6. CARE AND MAINTENANCE

This section describes the care and maintenance tasks that must be performed to optimize the operation of your Marantz equipment.

### CLEANING OF EQUIPMENT EXTERNAL SURFACES

The exterior finish of your unit will last indefinitely with proper care and cleaning. Never use scouring pads, steel wool, scouring powders or harsh chemical agents (e.g., lye solution), alcohol, thinners, benzene, insecticide or other volatile substances as these will mar the finish of the equipment. Likewise, never use cloths containing chemical substances. If the equipment gets dirty, wipe the external surfaces with a soft, lint-free cloth.

If the equipment becomes heavily soiled:

- dilute some washing up liquid in water, in a ratio of one part detergent to six parts water.
- dip a soft, lint free cloth in the solution and wring the cloth out until it is damp.
- wipe the equipment with the damp cloth.
- dry the equipment by wiping it with a dry cloth.

## 7. REPAIRS

Only the most competent and qualified technicians should be allowed to service your unit. Marantz and its factory trained warranty station personnel have the knowledge and special equipment needed for repair and calibration of this precision instrument.

In the event of difficulty, call the toll-free telephone number listed on the face of the warranty to obtain the name and address of the Marantz Authorized Service Center nearest you. In many cases, the dealer where you purchased your Marantz unit may be equipped to provide service. Please include the model, serial number of your unit together with a copy of your purchase receipt and a full description of what you feel is abnormal in its behavior.

## 8. TROUBLESHOOTING

The amplifier does not operate and the POWER ON indicator does not light.

- Is the power cable plugged in properly to the AC power outlet?

The POWER ON indicator lights, but the amplifier does not function.

- Are speaker cables and input cables connected properly?
